

# CONTRACTOR

70-130 HP

What can we say? Grader blades are in our DNA – and more than 40 years since our first one, they're still being used to dig, move, scrape and shape land throughout New Zealand. Tough manganese steel cutting edges with 85% of the blade weight bearing down on them deliver performance that puts other blades to shame.

Manganese hardened steel cutting edge

85% of total weight on cutting edge

Bolt on land wheel bracket

Massive depth to carry more soil

Double plated mould board

Tapered beam for extra strength

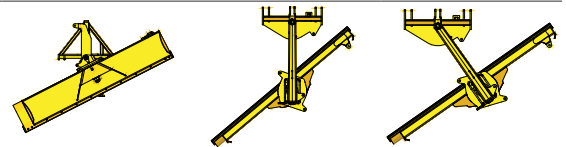

## Features:

- 85% of weight on cutting edge
- Reversible mould board for pushing instead of pulling
- Reversible cutting edge
- Massive depth mould board to carry a more serious amount of dirt
- All rams and manual adjusters mounted well clear of any soil build up
- Bolt on land wheel bracket
- Fully lubricated swivel, offset and turntable pivot points
- Tapered main beam for extra strength
- Turntable and tilting pivot pins work on hardened, heavy duty bushes
- Full three way adjustment (manual or hydraulic)

## OPTIONS:

- Manual operation
- Single hydraulic ram operation
- Twin hydraulic ram operation
- Triple hydraulic ram operation
- Manual leveling wheel kit
- Hydraulic leveling wheel kit
- Adjustable rippers
- Diverter kit
