

MIDI 120

15-40 HP

What can we say? Grader blades are in our DNA – and more than 40 years since our first one, they're still being used to dig, move, scrape and shape land throughout New Zealand. Tough manganese steel cutting edges with 85% of the blade weight bearing down on them deliver performance that puts other blades to shame.

Welded cutting edge

85% of total weight on cutting edge

3 way pin adjustment

High clearance

Optional rear leveling wheel

Tapered beam for extra strength
